## Evening Brief

Date: Tuesday October 2<sup>nd</sup>, 2018

---

### Weather Summary

A prolonged period of cool and wet weather will impact the entire Great Basin through the remainder of the week, with most of the entire area seeing widespread wetting rain by Thursday, the exception being parts of South Central Idaho in the valley and foothills seeing only spotty showers the next few days, albeit with higher humidity.

Snow is possible Thursday evening above about 7,000 feet across the northern half of the area. Widespread heavy precipitation and significant snow above 6000 feet possible across the eastern portion of the Great Basin this weekend.

---

### Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	3	Light Initial Attack Activity GB New Fires and Acres: 3 fires 151.3 acres; 3,936 acres large fire growth
National	2	

---

Great Basin Fuel Status [interactive link](#) (Use Edge, Chrome or Firefox browsers)

Fuels and Fire Behavior advisory has been updated and issued for [Northern Great Basin](#)

### Fuels/Fire Potential

Most fuels will quickly modify to normally moist October normals in the next 1-2 days. The exception will be lower portions of South Central Idaho which will only see gradual moistening the next few days, but should finally see wetting rains there this weekend. For about 90% of the region, this will end up being a season ending event once this cool, moist weather pattern enters its 7<sup>th</sup> consecutive day by early next week.

### Resources

#### Aviation within the Great Basin

- 2 VLAT's, 6 LATs, 0 CL-415's
- 9 SEATs, 4 Fire Bosses
- 10 Type 1 Helicopters / 6 Committed
- 10 Type 2 Helicopters / 5 Committed
- 16 Type 3 Helicopters

#### Crews Committed within the Great Basin

- 8 IHCs Committed / 0 Available
- 16 T-2 IAs Committed / 0 Available
